

WOULD YOU EVER KNOW (*Living version*)
(Ad Vanderveen)

Intro:

G A Bm

Would you ever know how much I love you

G A Bm

If I only let on feeling blue

G A Bm

Only wanna show how much I love you

G A Bm

More than words alone will do

G A F#m

Got a little song to say I love you

In simple chords and simple words

And I wanna feel it's worthy of you

Even if it's never heard

Shouldn't be too hard to know I love you

If it's in all we do and all we say

If I could only reach the stars above you

Between the lines the notes to play

And I wanna take you on a journey

And I wanna make you free to roam

If we get there late or get there early

Well it don't matter we're leaving time alone

And it don't matter we leave ourselves alone

And then we come back and see how much we've grown

And then we come back and feel that love has grown

Find ourselves at home

Would you ever know...
